

Store once. Find instantly.

ENIT Store is a fast and intuitive solution for storing, finding, and managing documents. It saves time, reduces manual work, and keeps you fully in control — **helping you work faster, stay organized, and handle invoices, letters, and other key documents with ease.**

— THE BUSINESS VALUE

- 01 **Built for transactional documents** — Store invoices, letters, and other transactional documents in a structured, metadata-rich way — never lose a document or its context.
- 02 **Instant retrieval** — Metadata-driven search — customer, supplier, invoice number — combined with date intervals. Search any document when you don't know where to look.
- 03 **Preview, download, email** — Open documents in-browser, download single or many as ZIP or merged PDF, and email individually or in bulk — all from a configurable, column-friendly results list.
- 04 **Traceability built in** — Comments and activity history on every document. Bookmark recurring searches in your browser for one-click access to daily and weekly workflows.
- 05 **Admin-controlled and access-aware** — Per document type: filename templates, retention time, searchable metadata fields. Role-based access by document type and metadata.

— WHO BENEFITS MOST?

AP/AR teams, customer service, compliance, and document operations — anyone handling thousands of invoices, statements, letters, or other transactional documents who needs them findable and shareable in seconds. Common in financial services, utilities and telecom, public sector, and any high-volume document operations.

— BUILT BY ENIT

CCM specialists with +10 years of Nordic implementations — across OpenText, Quadiant, and SMART Communications environments. Unlike vendor-native archives, ENIT products works across platforms and ERPs from day one, because our customers rarely run just one system.
